

Kindergarten Educational Scheme

School-based Learning Activity of Chinese Culture

Display Form

Peace Evangelical Centre Kindergarten

Name of School

23-24

School Year

K2

Grade Level

Name of Activities

Fun Farming

Objectives of Activities

1. To understand the growth process of seeds through the "Seed Growth Fable" story.
2. To observe the environment and crops on the farm through the farm visit.
3. To introduce children to the various elements and conditions required for plant growth through simple farming practices.

Summary of Activities

This activity involved visiting an organic educational farm, the Green Field Foundation, with the preschool children. A tour guide shared the "Seed Growth Fable" story with the children, allowing them to learn about the growth process of small seeds and the conditions necessary for plant growth. Afterwards, the children became little farmers, engaging in activities such as loosening the soil, sowing seeds, and watering. During the farm visit, the children also had the opportunity to visually, tactilely, and olfactorily experience the farm's crops, fostering their preliminary understanding of organic farming and sparking their interest in vegetables and nature.
